

The Public Works Department serves you year-round. Whether you need snow removal, a new water hookup, or information on a building code, Public Works is here to serve you.

Are you going to dig?

At least two business days before you intend to dig, you should call **One-Call of Wyoming** (Dial 811 on your phone or 800-849-2476) and request the location of all underground facilities in the area of the construction or excavation.

Wyoming law requires underground facility owners to respond in two business days and to locate their facilities with marks on the surface. After the locate, you may proceed with the excavation. But remember, if you know there are facilities in the area of your dig, you may need to take special care not to damage underground facilities and this may sometimes require hand digging as a precaution.
